RE: Notification for Plant Delivery (147-153 Kurraba Road, Kurraba Point)

Dear Residents,

As you may be aware, we have commenced construction of 147-153 Kurraba Road, Kurraba Point.

We will be undertaking a dropoff of a plant & machinery that will be on **Wednesday 18/11** between 3:00am-4:00am (off-peak traffic). This will take approximately 30 minutes.

A traffic management plan has prepared and approved by council for the delivery of this machine. Traffic controller teams will be set up along Kurraba Road during this time.

Residents further south on Shellcove Road will be able to detour while the machine is tracking between Billong Street and Shellcove Road (approx. 30 mins).
Between Shellcove Road and the job-site will also take approximately 30 minutes.

Delivery:

One 19m articulated vehicle used to deliver each plant separately. Vehicle to use the proposed approach route (See appendix A) to access Kurraba Road and then use Billong Street to turn around and continue south along Kurraba Street in a reverse direction. The vehicle will reverse down Kurraba Road to stand as close to the site access point as possible to unload the plant. Rubber mats used under plant to protect the road surface.

Traffic Management: Traffic Controllers to hold vehicles in all directions to allow the vehicle to turn around using Billong Street. Traffic controllers will escort the vehicle / plant south along Kurraba Road to ensure a safe travel path. Northbound vehicles to be held or managed around the plant as required by the escorting traffic controllers.

Pedestrian Management: Normal access along the footpath maintained along Kurraba Road. Site access traffic controller to manage pedestrian access as required when plant is crossing the footpath into the site.

We endeavour to reduce impact and minimise disruption to all surrounding residents and appreciate your patience and corporation during the construction phase.

For a full copy of the traffic management plan, please visit the community website:
